Centre for Policy Research
Member of NITI Aayog of
India

Mr. Justice AM Ahmadi
Fmr. Chief Justice of India

Mr. Subir Gokarn
Fmr. Dy. Governor, RBI, India

Testimonials

"It is important that decision-makers and social justice campaigners continue to interface at such forums in order to explore improved ways of monitoring service provider accountability and responsibility to the general public." Change highlighted word to - decision-makers *Mr. Ishmahil Blagrove Jr | Author and International Social Justice Campaigner*

It is always a learning experience because of the interaction. There is always something new happening. And we meet old colleagues. *Dr. Pramod Deo | Former Chairman, CERC*

It is one of the unique forums to meet so many regulators and decision-makers for energy in India. It's an amazing place to really share thoughts and meet so many of them all over India and sometimes from several other countries all at once. From that perspective, I think it's something very special about that retreat. *Mr. Pashupathy Gopalan | President, Asia Pacific and Sub-Saharan Africa, SunEdison*

IPPAI is doing a wonderful job because they bring companies and regulators together, where regulators really hear from companies what their viewpoint is and what problems they are facing. Regulators too talk about the dilemma they face regarding various legal issues. On this platform, there is exchange of ideas and discussion of new areas like solar. *Mr. Sushil Maroo | MD and CEO, Essar Power Limited*

It's an excellent opportunity to share views for the development of the sector, to exchange ideas, communicate with people and to listen to various opinions, which eventually will enrich and make the entire sector vibrant and strong. *Mr. Gopal Saxena | Director, BRPL and BYPL*

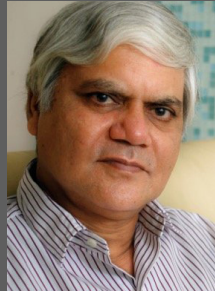

Speakers at AESS

General J. J. Singh (Retired)
Fmr. Chief of Army Staff
Indian Army and Fmr.

Sri Lanka

Mr. Sidharth Balakrishna
Senior Manager and Strategist
Business Transformation
Cairn Energy, India

Mr. Humayun Kabir
Fmr. Ambassador of the
People's Republic of
Bangladesh to the United
States

Testimonials

We want to flag our thoughtful and serious approach towards energy security. This gathering partakes of the work that is already going on and is in fact, a very beneficial step in that direction. *Mr. Salman Khurshid | Minister of External Affairs, India*

Some experts believe that Indonesia will reduce its coal exports significantly and, the Indonesian government may be actually planning to do so. However no final decision has been made regarding this. *Prof. Dr. Bukin Daulay | Senior Researcher, Center for Research & Development, Ministry of Energy & Mineral Resources, Republic of Indonesia*

US' Shale boom may lead to an increase in energy exports and a reduction in prices, but one should not read too much into this since it is a very new phenomenon. Since a lot of coal will be replaced by natural gas in the US, it could export high quality coal in times to come. *Dr. Gal Luft, Co-Director, Institute for Analysis of Global Security | USA*

Thailand targets that renewable energy will constitute 25% of its total energy consumption by 2021 and as on date it has already reached an impressive 10.6%. Govt. mechanisms like tax incentives, facilitation to RE investments, adders or feed in tariff to RE projects, ESCO funds etc. have helped to achieve the fast growth. *Dr. Poonpat Leesonbatpaiboon | Chief of the International Energy Cooperation Office, Ministry of Energy, Thailand*

India's Oldest Power Sector Forum

About Us

As an established forum, the Independent Power Producers Association of India is a catalyst for positive transformation in policy and regulations in the Indian power and allied sectors. Over the years, we have brought together important decision-makers such as esteemed members of parliaments, government authorities, regulators, policymakers, financial institutions, independent power producers, power consumer, transcos, discoms and experts in the sector to deliberate upon issues for power market reform.

Conferences

IPPAI has, over the last two decades, conducted over a hundred workshops, round table meetings, energy summits and international conferences on a wide range of subjects such as financing, regulation, policy initiatives, along with environmental and consumer concerns by NGOs.

These initiatives have yielded a wealth of data and information on how to tackle issues and bottlenecks pertaining to a wide range of critical policy matters across the Indian power and allied sectors. The recommendations that emanate from these initiatives are forwarded to the concerned policy-makers for their consideration and necessary action.

Impacting Policy

IPPAI's path-breaking initiatives are filed as recommendations to key decision-makers. IPPAI has been involved in the preparation and implementation of the electricity regulatory movement right from the beginning.

USP

The fast-paced developments in the sector have opened up new opportunities, prospects and business models, offering great potential for future growth in the sector on a sustainable basis.

Our conferences, seminars and summits attract a high-calibre audience of key decision-makers and opinion makers across businesses and government, providing excellent opportunities for networking and branding.

Due to its unique neutral disposition within the sector, IPPAI is able to interact with regulators from a position of strength. Such interactions enable IPPAI to provide cutting-edge information on developments in the market and the emerging situation, much before anyone else can. IPPAI continuously organizes a series of pivotal initiatives that are engaging and revelatory due to the nature of the topics under discussion and the presence of distinguished speakers and key decision-makers who participate in our forums.

IPPAI Events

Powering Cambodia

Exploring investment opportunities in the power sector in Cambodia (solar, biomass, DDG, rural electrification)

Feb 24-25, 2016 | Hotel Sofitel, Phnom Penh, Cambodia

IPPAI, in association with Ministry of Mines & Energy, Cambodia, is facilitating a delegation of investors and experts from the Indian power sector to explore investment opportunities in the Cambodian power sector.

- High Powered Roundtable discussion to share best practices
- B2B meetings with the key decision makers.

Asia Energy Security Summit

A cerebral track II diplomacy platform to discuss energy security, geo-politics of energy & security of critical energy infrastructure

March 1 - 3, 2016 | Radisson Goa Candolim, Goa, India

The Asia Energy Security Summit is a Track II Diplomacy Initiative of IPPAI where government, industry leaders, regulators, policymakers, academicians and think tanks from across the world come together to discuss and debate issues relating to the entire energy spectrum, particularly the emerging issues and challenges in the energy landscape of Asia. The proceedings from the previous conclaves are carried forward for review and discussion.

17th Regulators & Policymakers Retreat

India - meeting the aspirations ?

22-25 September, 2016 | The Lalit, Goa, India

The Regulators and Policymakers Retreat, now in its 17th edition, is IPPAI's annual flagship event that brings together thought-leaders and experts who discuss and brainstorm on issues in the energy and power sectors covering relevant policy and governance topics. The RPR over the years has won for itself a position of distinction and has been recognized as a confluence of innovative and informative flow of ideas and knowledge.

Legal & Tax Summit

The evolving legal scenario in the power sector and the way forward

October 2016 | India

Analysis of the existing legal and fiscal framework and discussions on alignment of law, policy and regulation for the emerging billion dollar investment opportunity in the Indian renewable energy and energy infrastructure sector.

IPPAI Initiatives

ET NOW's Knowledge Partner for Power Play

52 episodes starting March 2016

Power Play is ET NOW's unique television campaign for better power which will bring together key industry stakeholders, policy-makers and industry analysts on a weekly basis. The country's oldest association for independent power producers, IPPAI, and the nation's number one business channel will work in partnership to bring to its audience the latest and most topical issues in the power sector.

Brace yourself for some high powered discussions on your television screens!

IPPAI Regulatory and Policy Research Institute

Regulation | Policy | Ecology

April 13 - 17, 2016 | Belgundi, Karnataka, India

A first of its kind, the course will provide you with the fundamentals for working on power sector regulation, whether in a regulatory commission, in a regulatory department within a company or as a policy-maker. Taught by world class experts, the course will give you a thorough understanding of the main concepts and ideas of power sector regulation from an engineering, regulatory, economic and ecological perspective.

IPPAI Supports

De-regulation of Power in UK:

Overview, Distribution Side Reforms and Future Challenges

25 – 27 April 2016 | Imperial College London, United Kingdom

IPPAI and Global Energy Private Limited are organising a 3-day course on De-regulation of Electricity, in collaboration with Imperial College London to be held at Imperial College London's South Kensington campus, from 25-27 April, 2016.

The primary objective of the course is to share expertise and provide international exposure to all the participants on deregulation of electricity. Specialists from the region are invited to discuss with their counterparts specific topics related to deregulated market development and operations.

Smart Water Management for Smart Cities

A unique business opportunity for companies involved in the entire water supply chain

February 15, 2016 | Jacaranda Hall, India Habitat Centre, New Delhi, India

February 17, 2016 | Centrum Hall, World Trade Centre Mumbai, India

The objective of hosting this conference is to bring together key stakeholders in the water management sector to discuss the challenges to develop a smart approach to deliver robust urban water infrastructure and services. This approach can be planned through existing and new partnerships between urban planners, water service providers, government agencies, regulators and other stakeholders to meet sustainability and liveability objectives.

4th Secure BFSI Conclave

Mobile Services & Cyber Security

May 17, 2016 | The Lalit, Mumbai, India

This event brings together cyber, information security and fraud prevention experts from across the financial sector to discuss security vulnerabilities and put forth effective strategies and solutions to mitigate them. This conference is held annually in Mumbai and is attended by senior banking and insurance professionals in addition to various associated government agencies.

Securing Asia

July 17 - 19, 2016 | Windsor, United Kingdom

In its 5th edition, Securing Asia 2016 will open an international platform to discuss and debate the rising aspirations and challenges to building smart, secure and sustainable cities. The summit will focus on networking, trade, investment, partnership and joint venture opportunities along with sharing knowledge, case studies, best practices, market intelligence, trends, innovation and solutions.
